INSTALLER-FRIENDLY DESIGN UPDATE FOR ULTRA-THIN PUCK LIGHTING SOLUTION

Ultra-Thin Puck Lights are ideal where recessed lighting isn't feasible.

[**KEARNY, NEBRASKA – JANUARY 30, 2026**] – Task Lighting & Power, a Hardware Resources company, has introduced a design enhancement to the **Ultra-Thin Puck Light** that makes it faster and easier to install. The updated design features a lens attached to the fixture instead of the trim piece. This modification makes it easier and faster to snap the trim piece into place during installation.

Designed to make it easy to add lighting to tight spaces like shelving or nooks, the Ultra-Thin Puck Light is only 5/16” thick and mounts to surfaces with short screws concealed by the trim plate. It is available in four single-white lighting options (2700K warm, 3000K soft white, 4000K cool white or 5000K daylight white), and ships fully assembled with all the necessary hardware for fast installation. The Ultra-Thin Puck Lights can be paired with a compatible dimmer and a remote power supply (sold separately).

The Design Services team at Task Lighting & Power provides free technical and layout design support to help customers create comprehensive plans for every project. Learn more about Ultra-Thin Puck Lights and the complete line of Task Lighting & Power products at TaskLighting.com.

ABOUT TASK LIGHTING & POWER™
Founded in 1985, Task Lighting & Power, a Hardware Resources brand, has been a market leader in the development of LED lighting products for the kitchen and bath industry for over 40 years. Dedicated to providing problem solving products, Task Lighting & Power has been an innovator in under cabinet lighting and power technology. The company invented the original Angled Power Strip, a revolutionary product that puts power outlets out of sight but within easy reach under cabinetry or shelves. In addition to manufacturing and assembling products in Kearney, Nebraska, Task Lighting and Power provides professional lighting design services.
