Hardware Resources Announces New Products at KBIS 2026

Introducing NorthPoint Closets and new Jeffrey Alexander and Elements collections.

[**BOSSIER CITY, LOUISIANA – FEBRUARY 11, 2026**] – **Hardware Resources**, a leading manufacturer of quality products for the kitchen, bath, and closet industries, is launching a new line of closet storage solutions under the brand **NorthPoint Closets™** and several new decorative hardware collections under the **Jeffrey Alexander®** and **Elements™** brands at KBIS 2026.

NorthPoint Closets™ provide an easy way for kitchen and bath professionals to expand into the rapidly growing closet market. Customers can choose from pre-configured modules or create a personalized storage solution with hanging storage, shelving, and drawers. All units are shipped ready to assemble with no guesswork required. The innovative QuickSnap™ connection system reduces assembly time and hassle while providing a clean, elevated look to every closet space.

Jeffrey Alexander® by Hardware Resources is introducing four new decorative hardware collections: **Davis, Ogden, Nash, and Weser**. These four distinct collections range from soulful transitional curves to bold geometric lines, providing an all-encompassing portfolio that offers a sophisticated, tailor-made hardware solution for every design vision. In addition, the **Elements by Hardware Resources** brand is debuting the **Brewer** collection, a minimalist style with a strong architectural influence and a distinctly defined rectangular

form. Each of these new Jeffrey Alexander and Elements collections offers a comprehensive range of sizes, including appliance handles in select collections, featuring designer-inspired finishes that serve as the perfect finishing touch for any space.

The new collections are included in the Jeffrey Alexander designer sample program, and showroom display boards are also available. For more information on the new collections and the complete line of Jeffrey Alexander decorative hardware, visit HardwareResources.com/Decorative-Hardware.
