INTRODUCING THE UNIVERSAL OVERHEAD SWINGOUT

Organizer solution that maximizes the utility of overhead storage space for bulky items and small appliances

BOSSIER CITY, LOUISIANA, NOVEMBER 6, 2025—Hardware Resources, a leading manufacturer of quality products for the kitchen, bath, and closet industries, has introduced a new organization solution that optimizes hard-to-reach storage space over refrigerators and ovens. The **Universal Overhead Swingout** makes it easy to store and access items stored in deep, counter-depth overhead cabinets, bringing back-of-the-cabinet storage within easy reach.

With a **30 lb. weight capacity**, the Universal Overhead Swingout is ideal for storing small appliances like air fryers, blenders, and mixers that often clutter kitchen countertops. The **no-measure, easy installation** design allows installers to simply place and screw the unit into position, saving valuable time during setup.

“Designers and cabinet makers are constantly looking for ways to make every inch of space functional,” said Amy Whalen, Product Manager, Cabinet Organizers and Storage Solutions for Hardware Resources. “The Universal Overhead Swingout provides a smarter, easier way to utilize deep cabinets while maintaining a polished, high-end look.”

The Universal Overhead Swingout is designed for use in face frame or frameless cabinetry and is compatible with NorthPoint Cabinetry. The universal design allows it to be mounted left- or right-handed, simplifying ordering and installation. The adjustable door mounting bracket ensures precise alignment on a variety of door styles, keeping mounting screws securely fastened to the door frame. For cabinets over 30” wide, two swingouts can be installed to maximize hard to reach overhead storage space.
